

INBOUND CARRIER SALES / SEPTEMBER 2026

Your carrier desk, simplified.

A practical guide to your voice agent,
your operations desk, and the moments
that need your team.

Illustrative routes

01 / CARRIER

Tell us the need.

Share carrier details
and the desired load.

02 / VOICE AGENT

Work through the call.

Verify, find a match, negotiate
and save the outcome.

03 / YOUR TEAM

Take the next step.

Review agreements
and handle follow-up.

For brokerage operators and managers.
This guide covers the delivered demo workspace.

[Start your first call · page 3 ↗](#)

01 / THE CALL JOURNEY

From hello to a clear next step.

The agent guides the conversation. Your team reviews the agreed terms and handles requests that need a person.

Verification comes first.

Carrier authority and identity must be confirmed before load matching can continue.

In this demo, a saved agreement goes to operator review. Bookings and senior-rep handoff are simulated.

Negotiation has clear limits.

Up to three counter rounds per call, within the brokerage's private pricing limits.

02 / YOUR FIRST CALL

Open the page. Speak naturally.

Use a quiet space and a microphone. Keep the workspace open throughout the conversation.

■ LIVE DEMO

Talk freight. Find your next load.

Try a conversation with our logistics agent.

MC 135797 From Salt Lake City Try a counter of \$2,700

Start demo call

Ready to call

VERIFICATION CODE

Your code appears here during the call.

Keep this page open and speak naturally.

- 1 Start demo call**
Allow microphone access when prompted.

- 2 Verification code**
Read the code shown here when the agent asks.

- 01 Open your workspace.**
Sign in with the frontend password listed on page 7.
- 02 Start the conversation.**
Select Start demo call and share your MC number.
- 03 Confirm your identity.**
Read the code that appears during the call. The demo displays it instead of sending email or SMS.
- 04 Describe what you need.**
Give your departure city, equipment and route preferences.
- 05 Discuss the offer.**
Accept, counter or decline. After the call, find the result in Bookings & follow-up.

TRY SAYING / DEMO EXAMPLE

“My MC number is 135797.”

Use the suggested demo carrier.

“I’m looking for a load from Salt Lake City.”

Let the agent offer a current match.

“Could you do \$2,700?”

An example counteroffer, not a promised rate.

The code is specific to your call.

Use the code currently displayed. Available loads, offered rates and call outcomes can change.

03 / THE OPERATIONS DESK

Your operations desk.

Use the map to explore loads and the review queue to decide what needs your attention.

Actual demo interface · illustrative snapshot

1 Lane coverage

Select a route to inspect its load. Arrows point to the destination.

2 Filters

Narrow by city, equipment or availability. They change your view.

3 Needs attention

Start here for approvals and follow-up. Use All activity for other outcomes.

4 Request details

Expand a row to check the agreed rate, load facts and review reason.

5 Business performance

Booking requests

Requests received in the selected period.

Confirmed bookings

Confirmations recorded in that period.

Negotiation acceptance

The share of negotiations started in the period that reached agreement.

Choose Today, 7 days or 30 days. Demo confirmations are simulated; these figures are not production results.

Read the status with the data.

The map shows approximate load routes, not vehicle locations. A partial-data notice means coverage may be incomplete.

04 / REVIEW A BOOKING REQUEST

The terms are agreed. Your review comes next.

Open an **Awaiting approval** request. Check these four things before choosing a decision.

What “Confirmed” means in this demo

Approval records a simulated booking and a reference in the workspace. It does not reserve a load or change inventory in the external load system.

Need to add context? Use Add comment. The review history keeps decisions and notes together. Handle any separate follow-up item on its own.

05 / WHEN A CALL NEEDS ATTENTION

A clear outcome. A clear next action.

Check the saved outcome before acting. Not every call ends in a booking or needs a manager decision.

WHAT HAPPENED	WHAT YOU SEE	WHAT TO DO
01 / VERIFICATION Carrier cannot be verified	A verification outcome in All activity.	Read the reason. Verification must succeed before load matching; it cannot be skipped.
02 / NO AGREEMENT No suitable load or rate agreement	A no-match, declined or no-agreement outcome.	No booking to approve. Review only if there is an outstanding request.
03 / HUMAN HELP Caller wants help or a callback	A follow-up item with the saved request and available contact details.	Arrange contact outside the workspace. A recorded request does not place a call or send a message.
04 / BOOKING STATUS Booking is uncertain or unsuccessful	Check submission status, or Submission failed.	Check whether a booking exists before retrying. Verify availability and agree the next step with the carrier.
05 / INTERRUPTION Call ends with an unresolved issue	Resolve interrupted request, or Check unresolved request.	Read the saved details, establish what remains to be done, and record the next step.

Read the request → Resolve the issue → Save a note

Complete the follow-up review after the work is done. A note is required. You can reopen a review with a note if more work is needed; closing it does not change a booking or contact the carrier.

06 / KEEP THE DESK MOVING

Start with attention. Finish with clarity.

A simple routine for every operator using the workspace.

- | | | |
|----|--------------------------------|--|
| 01 | Open Needs attention. | Review approvals and outstanding requests. Check pickup urgency and waiting time. |
| 02 | Read the full request. | Check carrier, load, rate and the reason for review before deciding. |
| 03 | Act, then leave a note. | Approve, request changes, reject or arrange follow-up. Record what was resolved. |
| 04 | Review the period. | Check requests, confirmations and negotiation acceptance. Keep demo activity in context. |

Know your demo workspace.

CONNECTED & RECORDED

Carrier authority checks and live load inventory.

Voice conversations, saved outcomes, negotiation details and review decisions.

SIMULATED & MANUAL

Codes appear on screen. Booking approval and references are simulated.

Your team handles carrier contact and documents. No live transfer, automatic callback or notification is sent.
